

VORTEC Development, Inc.

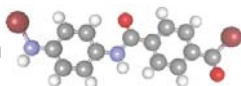

Our Focus

Our mission is to develop, research and design state of the art defense systems for a constantly evolving threat.

VORTEC Takes great pride in the quality of work we provide our men and women of the armed forces and law enforcement communities. It is our goal to produce the highest level of quality in every product so that all who use it can depend on it.

Our vast knowledge of the tactical environment helps to shape the development of our own line of products. From Rifle to Tactical gear you carry only the best from VORTEC.

Armor Division

The development of armor used both in law enforcement and military applications was created to be a reactive solution to changing threats from criminals and combative nations. Armor is an ever evolving experiment with costly variables. As armor has been improved the technology has become reactive to the changes in ballistic threats (a better bullet = better armor).

To understand the nature of VORTEC's armor technology one must first understand the purpose behind the research and development in our armor. Many of us in our armor division have family and friends in law enforcement and in theater in Iraq. We strive to provide the best technology in armor to bring our family and friends back as well as yours. We stand behind every unit of armor sold with the knowledge of testing and engineering that has been applied to it.

Capabilities

Cut & Sew Operations

- Custom Design & Prototyping
- Digitizing, CAD & Plotting
- Branded Designs
- Production Manufacturing
- Tactical, Medical, Apparel & Specialty

Soft Armor Operations

- Patented Designs
- Custom Fitting and Design
- Any Level (II, IIA, IIIA Covert/Overt)
- Made to Mil-Spec or Client Specifications
- Material Licensing and Sales
- Military and Commercial Models

Hard Armor Operations

- Custom Vehicle Armor
- Ballistic Glass & Plastic
- Laminated Armor Plates
- Dwelling Ballistic Protection

Weapons Systems

- Manufacturer
- Munitions
- Destructive Device Manufacturer
- Destructive Munitions Manufacturer
- Weapons Design and Development
- Custom Stocks
- Gunsmithing
- Weapon Modifications
- Competition/Precision weapons
- Dura-Coating
- Parts Distributor
